

➤ Introduction

Here is an overview of how I spend my week—studying, working at my internship, and handling personal responsibilities. I want to see where AI actually helps, what needs a real person’s eye, and when I just need to trust myself. Breaking things down like this will help me get smarter about using AI, boost my productivity, and set myself up for what comes next in my career.

➤ Workflow Audit Table

Recurring Task	Classification	Rationale
Completing university assignments	Collaborate with AI	AI helps generate ideas and explanations, but final work needs my review.
Studying database concepts	Collaborate with AI	AI explains difficult concepts in simple language.
Learning front-end development	Collaborate with AI	AI provides examples and coding guidance while I practice myself.
Creating LinkedIn captions/posts	Delegate to AI with review	AI improves wording and professionalism.
Writing professional emails/messages	Delegate to AI with review	AI drafts messages quickly, but I review before sending.
Summarizing study notes	Fully automate	AI can quickly create concise summaries.
Preparing presentations	Collaborate with AI	AI helps with content while I handle design and final editing.
Researching internship opportunities	Collaborate with AI	AI suggests opportunities, but I make the final decisions.
Organizing documentation	Fully automate	AI can format and structure documents efficiently.
Creating study schedules	Delegate to AI with review	AI suggests plans that I adjust according to my routine.

Practicing interview questions	Delegate to AI with review	AI can simulate questions and feedback.
Family decisions	Just Me	Personal values and circumstances require human judgment.
Scholarship and financial decisions	Just Me	These decisions depend on my personal and family situation.

➤ Target Tasks for FL-02 to FL-04

Task 1: Professional Email and Message Support

Why I picked this task: I am constantly sending emails for internships, applications, and reaching out to new contacts.

What “done well” looks like:

- Grammar checks out.
- The message sounds professional and respectful.
- Everything is ready to send in five minutes or less.

Task 2: Study Material Summaries

Why I picked this task: I rely on solid, short notes whenever I am gearing up for exams or quick revisions.

What “done well” looks like:

- Covers the main ideas and must-know points.
- The summary is clear and easy to scan.
- Cuts my study time in half.

Task 3: Programming Concept Explanations

Why I picked this task: I study BSIT and work as a front-end intern, so I run into tricky tech concepts all the time.

What “done well” looks like:

- Explanations use plain English.
- Good examples back up the ideas.
- I double-check the info before using it in my code or assignments.
